PROFESSIONAL SUMMARY

Backend-focused Full-Stack Engineer with strong experience building API-driven web applications using Node.js, TypeScript, and modern JavaScript frameworks. Skilled in designing and implementing RESTful services, authentication systems, and database-backed applications with a focus on scalability, security, and performance.

Experienced in translating product requirements into working backend systems, integrating frontend applications with robust APIs, and building admin and user management systems. Actively developing deeper expertise in relational databases, system design fundamentals, and production-grade backend architecture for high-reliability applications.

TECHNICAL SKILLS

Backend Development:

Node.js, Express.js, Django (basic), RESTful API design

Languages:

TypeScript, JavaScript, Python

Databases:

MongoDB, Supabase (*actively expanding into PostgreSQL/MySQL*)

System Concepts:

Authentication & Authorization (JWT), API design, CRUD systems, request validation, error handling

Frontend (supporting role):Next.js, React

Tools & Practices:

Git, GitHub, Responsive Web Design, Component-based architecture

PROFESSIONAL EXPERIENCE

CARRBNG | Frontend Developer | January 2025 – Present

- Engineered and developed a modern landing page focused on user engagement and conversion using Next.js, Tailwind and TypeScript, ensuring 100% responsiveness across all device types .

- Designed intuitive UI/UX to clearly communicate product value.
- Optimized web performance and core Web Vitals, resulting in faster page load times and smoother user experience for the landing page
- Translated complex Figma designs into reusable, pixel-perfect component libraries thereby reducing development time for future features by 25%.
- Implemented Responsive Web Design (RWD) techniques to ensure a seamless experience across mobile, tablet and desktop, improving mobile user retention.

NACOS ESUI COMMUNITY PLATFORM | Lead Frontend Engineer

- Architected and developed a comprehensive digital ecosystem for the NACOS ESUI chapter, comprising a high-traffic landing page, a secure user portal, and a robust administrative dashboard.
- Engineered a custom User Dashboard using Next.js and Typescript, allowing 1,155+ active Nacosites to manage their track events, and access department resources seamlessly.
- Optimized for performance & UX: Implemented custom Error handling (Including a unique 404 experience), a responsive design for all device types and optimized asset delivery for fast loading on school network.
- Tech Stacks: Next.js, TypeScript, Tailwind CSS

Ecommerce Backend API (Node.js, Express, MongoDB)

- Designed and implemented a layered backend architecture using **Controller–Service–Repository pattern** to enforce separation of concerns and improve code maintainability
- Applied **Dependency Injection (DI)** principles to decouple business logic from infrastructure layer, improving testability and scalability
- Built secure authentication and authorization system using JWT with role-based access control (admin/user)
- Developed modular RESTful APIs for product and category management with structured data modeling and validation
- Implemented centralized error handling and request validation middleware to ensure system reliability and consistency
- Used OOP principles to design reusable service components and maintain clean domain logic separation

EDUCATION

OND Computer Science, *FEDERAL POLYTECHNIC AUCHI, AUCHI*

BSc Computer Science, *EDO STATE UNIVERSITY IYAMHO, IYAMHO-UZAIKUE*

MENTORSHIP & LEADERSHIP

- Mentored junior students in HTML, CSS, JavaScript, React.js fundamentals
- Guided beginners move from theory to building actual projects
- Assisted peers in debugging and understanding core web development concepts.

CORE STRENGTH

- Backend API development and system integration
- Translating UI systems into functional backend-driven applications
- Strong problem-solving and debugging ability
- Rapid learning and adaptation to backend architecture patterns
- Collaborative development in team environments
