

INU GEORGE ENIKE

Frontend/Full-Stack Engineer

PROFESSIONAL SUMMARY

Frontend-focused Full-Stack Engineer experienced in building responsive, API-driven web applications using React, Next.js, TypeScript, JavaScript, and Tailwind CSS. Experienced in translating product and Figma designs into reusable, responsive interfaces, integrating REST APIs, implementing authentication flows, and building dashboards and user-facing portals.

Also experienced with Node.js, Express.js, PostgreSQL, MongoDB, and REST API development, providing strong end-to-end understanding of modern web application architecture. Comfortable working across codebases, collaborating on product development, and building maintainable applications focused on usability, performance, and reliability.

TECHNICAL SKILLS

Frontend : React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Responsive Design, Component Architecture, Figma-to-Code

Backend Development:

Node.js, Express.js, Django (basic), RESTful API design

Languages:

TypeScript, JavaScript, Python

Databases:

MongoDB, Supabase *PostgreSQL*

System Concepts:

Authentication & Authorisation (JWT), API design, CRUD systems, request validation, error handling

Tools & Practices:

Git, GitHub, Redis, Axios, Component-Based Architecture, MVC / Module Based/ Layered Architecture

PROFESSIONAL EXPERIENCE

CARRBNG | Frontend Developer | January 2025 – Present

- Build and maintain responsive web interfaces using Next.js, React, TypeScript, and Tailwind CSS.
- Translate product and Figma designs into reusable, responsive frontend components.
- Develop interfaces that adapt across desktop, tablet, and mobile screen sizes.
- Integrate frontend applications with backend services and REST APIs.
- Implement user-facing functionality including navigation, forms, authentication-related flows, and application states.
- Improve frontend performance and contribute to Core Web Vitals and overall website performance.
- Work across the application codebase to troubleshoot issues, improve existing features, and deliver new product functionality.

NACOS ESUI COMMUNITY PLATFORM | Lead Frontend Engineer

- Led frontend development of a web platform built with Next.js, TypeScript, and Tailwind CSS.
- Built and maintained the platform's landing page, user portal, dashboard, error pages, and 404 experience.
- Developed reusable frontend components and responsive layouts for different user experiences.
- Built interfaces designed to support a platform with 1,155+ users.
- Integrated frontend functionality with application APIs and backend services.
- Worked on improving usability, consistency, and maintainability across the frontend codebase.

SELECTED PROJECTS

Ecommerce Backend API (Node.js, Express, MongoDB)

- Designed and implemented a layered backend architecture using **Controller–Service–Repository pattern** to enforce separation of concerns and improve code maintainability
- Applied **Dependency Injection (DI)** principles to decouple business logic from infrastructure layer, improving testability and scalability
- Built secure authentication and authorization system using JWT with role-based access control (admin/user)
- Developed modular RESTful APIs for product and category management with structured data modeling and validation

- Implemented centralized error handling and request validation middleware to ensure system reliability and consistency
- Used OOP principles to design reusable service components and maintain clean domain logic separation

CampusWallet

React · Node.js · Express.js · MongoDB · Paystack

- Built a student-focused expense management application for tracking financial activity.
- Developed frontend interfaces for managing and viewing expense-related information.
- Integrated application functionality with backend REST APIs.
- Implemented payment-related functionality using Paystack.

SewDesk - Tailor Management System

Full-Stack Developer | Next.js, TypeScript, NestJS, PostgreSQL, Redis

- Built a full-stack tailor management platform for managing clients, clothing orders, measurements, payments, inquiries, and customer bookings.
- Developed RESTful backend APIs using NestJS and TypeScript for authentication, business management, clients, orders, payments, and booking functionality.
- Designed and implemented the PostgreSQL database structure and SQL queries for application data management.
- Implemented authentication and authorization with protected API endpoints and frontend route protection.
- Developed responsive frontend interfaces using Next.js, TypeScript, and Tailwind CSS.
- Integrated frontend applications with backend APIs using Axios, handling authentication state, loading states, and API errors.
- Implemented business slugs for readable customer-facing URLs, allowing booking pages such as /sewdesk/ezekiel-couture/book.
- Built reusable components and structured application state to improve maintainability across the frontend.

EDUCATION

OND Computer Science, *FEDERAL POLYTECHNIC AUCHI, AUCHI*

BSc Computer Science, *EDO STATE UNIVERSITY IYAMHO, IYAMHO-UZAIKUE*

MENTORSHIP & LEADERSHIP

- Mentored junior students in HTML, CSS, JavaScript, React.js fundamentals
- Guided beginners move from theory to building actual projects
- Assisted peers in debugging and understanding core web development concepts.

CORE STRENGTH

- Backend API development and system integration
- Full-stack application development
- Database design and data modeling
- Authentication and authorization
- Translating UI requirements into functional applications
- Problem-solving and debugging
- Learning and applying backend architecture patterns
- Collaborative development and Git-based workflows
